

# Reservations re-open for Osmose

Paris, France  
April 5th, 2023

**UNDER EMBARGO UNTIL 09:00 AM PT / 12:00 PM ET / 6:00PM CET APRIL, 5TH 2023**

*Expressive E is happy to announce that a new batch of [Osmose](#), its flagship MPE synthesizer, will be available for booking starting on April 5th, 2023. The estimated delivery date of these units is set for September-October 2023. Customers will be able to place a reservation on both Expressive E's website and its [affiliated dealers' channels](#).*

## Adapting to heavy demand

After the first deliveries of Osmose units in January 2023 and a successful booking round, the flagship synthesizer continues to be in high demand. While Expressive E is still focused on fulfilling the original backers' orders, the company also wants to give new musicians the opportunity to access Osmose and know its future availability dates.

A tense component supply and rampant inflation context has made the steady production of Osmose very challenging. Maintaining a delivery batch system will then allow Expressive E to guarantee the future availability of a limited quantity of Osmose units to clients who pre-order today.

## Osmose and artists

Now that players have started to receive their Osmose, reopening reservations is the perfect occasion to show how artists have adopted Osmose in their workflow. In two musicality-focused videos, [Jean-Michel Jarre](#) and [T.nava](#) (Free Nationals, Anderson .Paak) show how Osmose behaves in studio and live settings.

Electronic music legend [Jean-Michel Jarre](#) details how Osmose helped shape the intricate special effects of his latest release [Oxymore](#). He also explains how Osmose represents an important step forward for instrument craftsmanship.

In his interview, [T.nava](#) talks about his Stevie Wonder influences and creatively jams with Osmose in various jazz/soul live settings, showing how the synth can connect to musicians on stage and translate their energy into their music.

## How to book Osmose

To book an Osmose unit, new customers can directly visit [Expressive E's website](https://www.expressivee.com/2-osmose) and place a deposit of \$/€299. This deposit is refundable at any time. Alternatively, the expressive synthesizer can also be reserved with our [affiliated dealers](#). New pre-ordered units will have an estimated delivery date between September and October 2023. All information about the booking process can be found [here](#).
