

# Expressive E & Kilohearts announce the Phase Plant Expressive Suite: 4 expressive sound banks bringing 400 premium MPE presets to Phase Plant

Marseille, France

March 14th 2024

**EMBARGO: March, 14th 2024 09:00 AM PT / 12:00 PM ET / 6:00 PM CET**

*Expressive E has launched an MPE ecosystem through a first partnership with Kilohearts, makers of the award-winning softsynth Phase Plant. Based on 10 years of expressive sound design expertise, Expressive E has worked closely with Kilohearts to bring a no-compromise MPE experience to Phase Plant by designing 400 expertly-made MPE presets for Phase Plant (only available on [expressivee.com](https://expressivee.com)).*

## Bringing genuine expressiveness to musicians with the Phase Plant Expressive Suite

With the Phase Plant Expressive Suite, Expressive E aimed at developing a future standard for software-based expressiveness. The Suite combines the award-winning synth Phase Plant with a collection of four MPE sound banks (Delicious, Stripes, and Onirica Vol. 1 & 2), boasting more than 400 rich and diverse sounds expertly crafted by Expressive E.

Electric pianos, acoustic brass & winds, plucks, synth leads & pads, advanced wavetables and other sounds have all benefited from Phase Plant's powerful architecture and Expressive E's sound-design expertise.

Through deeply interactive controller gestures, musicians and producers will rediscover favorite instruments and sounds. The Phase Plant Expressive Suite **works perfectly with any MPE controller**, including Expressive E Osmose and Ableton Push 3.

  - as a bundle including Phase Plant \$/€99

- For Phase Plant owners
  - as a sound expansion pack for \$/€39
  - as 4 separate 100-preset packs for \$/€15 per pack

## Phase Plant, a perfect companion for Osmose

We sought to fully exploit Phase Plant's advanced modulation system and diversified synthesis abilities to develop a vast library of presets, all offering an unprecedented level of sound-gesture interaction to unlock new, complementary textures for Osmose users.

As Kilohearts' CEO Per Salbark explained below, both firms have worked closely to push the limits of musical expressiveness and make Osmose the perfect Phase Plant companion.

*"The Osmose is fantastic! The freedom of expression it gives fits perfectly into Kilohearts' design philosophy. We are so happy to work with Expressive E to bring Osmose owners even more ways to combine hardware and software in search of the perfect sound!"*

Musicians can learn more about the sound-design philosophy behind the Phase Plant Expressive Suite and how to use it with Osmose on YouTube.

## Videos to learn MPE sound design easily

Using Phase Plant's interactive and playful interface, Expressive E has just released two videos about MPE sound-design principles and the logical steps behind the creation of MPE patches with Phase Plant.

For Expressive E, MPE opens the gate for new sound-design approaches that are a joy to discover and explore. Check out this series of short video recipes to learn how we forged some of our favorite presets.

## About Expressive E

Expressive E is a French electronic instrument manufacturer, whose mission is to reinvent the way musicians interact with sound by creating a much more playful and powerful music-making experience. Their goal is to forge a seamless connection between artists and their instruments.

The firm is all about music tech innovation: It has created the gesture-reactive Touché MIDI controller range—made to control and interact with both in-house innovative synthesizers such as Imagine or Noisy and third-party gear. Its first standalone hardware synthesizer, Osmose, sets a new standard for music and keyboard expressivity. It is an easy-to-use electronic instrument that unlocks new ways to control sound via familiar gestures (press, bend, shake, and more). Osmose provides multidimensional control of each note while respecting the player's original keyboard skills.

## About Kilohearts

Kilohearts' ecosystem of plugins, with Phase Plant as the centerpiece, has become a staple in the sound-design world for its modularity and freedom to experiment. The rock-solid MPE support lets users get the most out of their controllers, such as the Osmose.

The company was founded in 2011 and is based in Linköping, Sweden.
